PRODUCT DESCRIPTION

Richard’s Paver Seal Clear Sealer/Finish is a specially formulated clear sealer and finish coating designed for application to brick pavers, concrete floors, and other cementitious type floor substrates. Formulated from solvent thinned 100% acrylic resins, it provides an extremely durable finish that penetrates and seals the surface, while providing excellent resistance to surface powdering, oil and grease stains, and provides superior resistance to moisture. Easy to apply, it provides excellent coverage and adhesion, excellent wear and weather resistance, and it resists yellowing. It provides superior UV resistance, has excellent product versatility, and its high gloss finish enhances the color of the surface, seals and waterproofs the surface, and helps resist hot tire pick-up.

APPLICATION EQUIPMENT

- Brush Application: Apply using a quality nylon, polyester or combination nylon/polyester, or a quality natural china bristle brush.
- Roller Application: Apply using a ¾” - ½” nap synthetic, lamb’s wool or mohair roller cover, depending on texture or surface porosity.
- Spray Application:
  - Pump: Gas or Electric Airless Sprayer
  - Pressure: Minimum 2000 PSI
  - Tip: 0.013 – 0.015 Reversible
  - Hose: ¼ inch (6.3 mm) - ¾ inch (10 mm)

PRODUCT LIMITATIONS

- Not for use in corrosive or chemical environments.
- Not for use in areas subject to intense heat.
- Not for use on below grade substrates.

CLEAN UP & THINNING INSTRUCTIONS

Clean Up: Clean up any minor spills and spatters immediately with Xylene, as well as all painting tools and airless equipment. More serious paint spills should be contained and removed with inert absorbent material. Dispose of contaminated absorbent, container, and unused contents in accordance with local, state and federal regulations.

Thinning: Stir thoroughly and apply as it comes from the container. Thinning is not necessary. Do Not Thin!

PRODUCT APPLICATION – General

Richard’s Paver Seal Clear Sealer/Finish may be easily applied with a quality brush, roller, or spray equipment as follows:

NOTE: This finish may become slippery when wet. Therefore, when used on horizontal surfaces, such as floors, patios, or any floor area exposed to moisture, the use of a non-skid additive is recommended, such as Richard’s SG-60, Skid Guard Non-Skid Additive.

- Surfaces to be painted should be completely dry for 24 hours before application.
- For best results, apply by brush or roller to effectively work material into surface pores.
- It is recommended to apply two (2) finish coats to achieve best results.
- Avoid heavy build-up of material.
- Brush Applications: When applying by brush, use a quality nylon or polyester bristle brush, or a quality combination of both, and apply a smooth and generous coat on smaller surface areas, such as cutting-in larger surfaces and painting trim.
- Roller Application: When applying by roller cover, use a quality smooth, medium or rough nap roller, depending on surface porosity, and apply an even and generous coat in a “W” or crisscross motion, avoiding any excessive respreading or reworking.
- Spray Application: When applying by airless spray equipment, use a unit with a minimum of 2000 psi of pressure, with a 0.013 – 0.015 fluid spray tip.
- Rough or textured surfaces coated using spray equipment should be back-rolled to ensure a uniform film, even coverage and proper adhesion.
- Maintain a wet edge during application by brushing, rolling or spraying into previously applied coating area.
- Apply when surface and ambient temperatures are above 55° F and below 90° F. Do not apply when surface and air temperature is within 5° of the dew point.
- Avoid exterior paint application when weather conditions are threatening, and late in the day when there is a threat of moisture condensing on wet paint.

PRECAUTIONARY & SAFETY INFORMATION

CAUTIONS: FLAMMABLE! CONTAINS XYLENE AND TOLUENE! Keep away from heat, sparks, and open flames. Prevent build-up of vapors by opening all windows and doors to achieve proper cross-ventilation. Do not smoke. Extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and other sources of ignition during and until all vapors are gone. USE WITH ADEQUATE VENTILATION! Do not breathe dusts, vapors, or spray mists. Ensure fresh air entry during application and drying. If you experience eye watering, headache or dizziness, or if air monitoring demonstrates vapor / mist levels are above applicable levels, wear an appropriately fitted respirator, (NIOSH approved), during and after application. Follow respirator manufacturer’s directions for respirator use. Avoid contact with eye, skin and clothing. Use chemical safety glasses, goggles, or a face shield for proper eye protection. Wash thoroughly after handling, and before eating or smoking. Close container after each use. DO NOT TAKE INTERNALLY! Refer to MSDS for additional health and safety information.

NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the content herein may be harmful or fatal.

FIRST AID: In case of eye contact, flush immediately with plenty of water for 15 minutes, and get medical attention immediately; for skin contact, wash thoroughly with plenty of soap and water. If you experience difficulty breathing, leave area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately. If swallowed, do not induce vomiting. Get medical attention immediately.

KEEP OUT OF REACH OF CHILDREN!
