

RUST SHIELD

SHOP COAT PRIMERS

- Rust Preventative
- Resists Abrasion
- Easy To Apply

- Product Versatility
- Corrosion Resistant
- Lead Free

MORE QUALITY PRIMERS

#1015 Rust Shield Metal Primer - Red Oxide

Our premium industrial rust preventative metal primer. It is specially formulated to provide excellent long term corrosion protection for ferrous metal surfaces in both general maintenance and some industrial paint applications. Easy to apply, it provides excellent coverage, spreads evenly, resists sagging, has excellent leveling properties, penetrates into surface pores, and has excellent adhesion qualities for a smooth professional finish. It provides excellent durability and is moisture and abrasion resistant. For interior / exterior use.

#1017 Rust Shield Metal Primer - Zinc Chromate

Richard's Rust Shield Zinc Chromate Metal Primer is our premium zinc chromate primer specially formulated for application to a variety of metal surfaces. Its formula is designed to provide superior corrosion protection to both ferrous and non-ferrous metal substrates. It is suitable for both smooth and rough metal surface types and is an excellent production and shop coat primer. It applies easily, is rust inhibitive, dries fast and provides an excellent base coat for the application of latex, alkyd and oil-base finish coatings. Contains No Lead Pigments! For interior / exterior use.

#1018 Rust Shield Metal Primer - White

Richard's Rust Shield Metal White Primer is our premium industrial rust preventative metal primer. It is specially formulated to provide excellent long term corrosion protection for ferrous metal surfaces in both general maintenance and some industrial paint applications. Easy to apply, it provides excellent coverage, spreads evenly, resists sagging, has excellent leveling properties, penetrates into surface pores, and has excellent adhesion qualities for a smooth professional finish. It provides excellent durability, is moisture and abrasion resistant. For interior / exterior use.

#1120 Industrial Universal Metal Primer - Off White

A high performance primer formulated for application to metal substrates only. Its special formulation allows for the application of a variety of finish coatings ranging from basic latex-base coatings to more industrial type coatings such as, two component epoxies and most oleoresinous coating systems. This rust preventative coating provides excellent corrosion resistance, alkali resistance and chemical resistance. It is easy to apply, may be applied to slightly rusted surfaces and offers excellent one coat coverage. Contains No Lead Pigments! For interior / exterior use.

#1131 Industrial Universal Metal Primer - Gray

A high performance primer formulated for application to metal substrates only. Its special formulation allows for the application of a variety of finish coatings ranging from basic latex-base coatings to more industrial type coatings such as, two component epoxies and most oleoresinous coating systems. This rust preventative coating provides excellent corrosion resistance, alkali resistance and chemical resistance. It is easy to apply, may be applied to slightly rusted surfaces and offers excellent one coat coverage. Contains No Lead Pigments! For interior / exterior use.

#1215 Excel Rust Shield 100% Acrylic DTM Primer - Gray

Specially formulated 100% acrylic, rust inhibitive primer/sealer that offers excellent product versatility, convenience, and ease of application to metal surfaces. Its special formulation enables application to a variety of both interior and exterior metal substrates, excellent coverage and adhesion, moisture resistance, and corrosion resistance. It dries fast, has a low odor, is mildew resistant, resists flash rusting, and is an excellent base coat for both water-based and alkyd/oil-based finish coatings. For interior / exterior use.

#1220 Excel Rust Shield 100% Acrylic DTM Primer - White

Specially formulated 100% acrylic, rust inhibitive primer/sealer that offers excellent product versatility, convenience, and ease of application to metal surfaces. Its special formulation enables application to a variety of both interior and exterior metal substrates, excellent coverage and adhesion, moisture resistance, and corrosion resistance. It dries fast, has a low odor, is mildew resistant, resists flash rusting, and is an excellent base coat for both water-based and alkyd/oil-based finish coatings. For interior / exterior use.

#1620 Industrial Coatings Quick Dry Rust Inhibitive Primer - Off White

Specially formulated rust inhibitive metal primer designed for application to both ferrous and non-ferrous metal surfaces. Its corrosion resistant formula promotes long term corrosion protection during project fabrication, storage, construction and erection phases, resulting in longer coating life. Its fast dry properties allow for quicker handling of in-shop or field applications, thus eliminating additional project down time. Easy to apply, it provides excellent coverage, excellent adhesion, penetrates surface pores, and offers excellent product versatility for use under a variety of hot solvent finish coatings, such as solvent epoxies. For interior / exterior use.
