THE ESSENTIALS OFF WHITES & NEUTRALS

Off-Whites & Neutrals are colors that can create a peaceful ambiance that is beautifully harmonious in any room of your home.

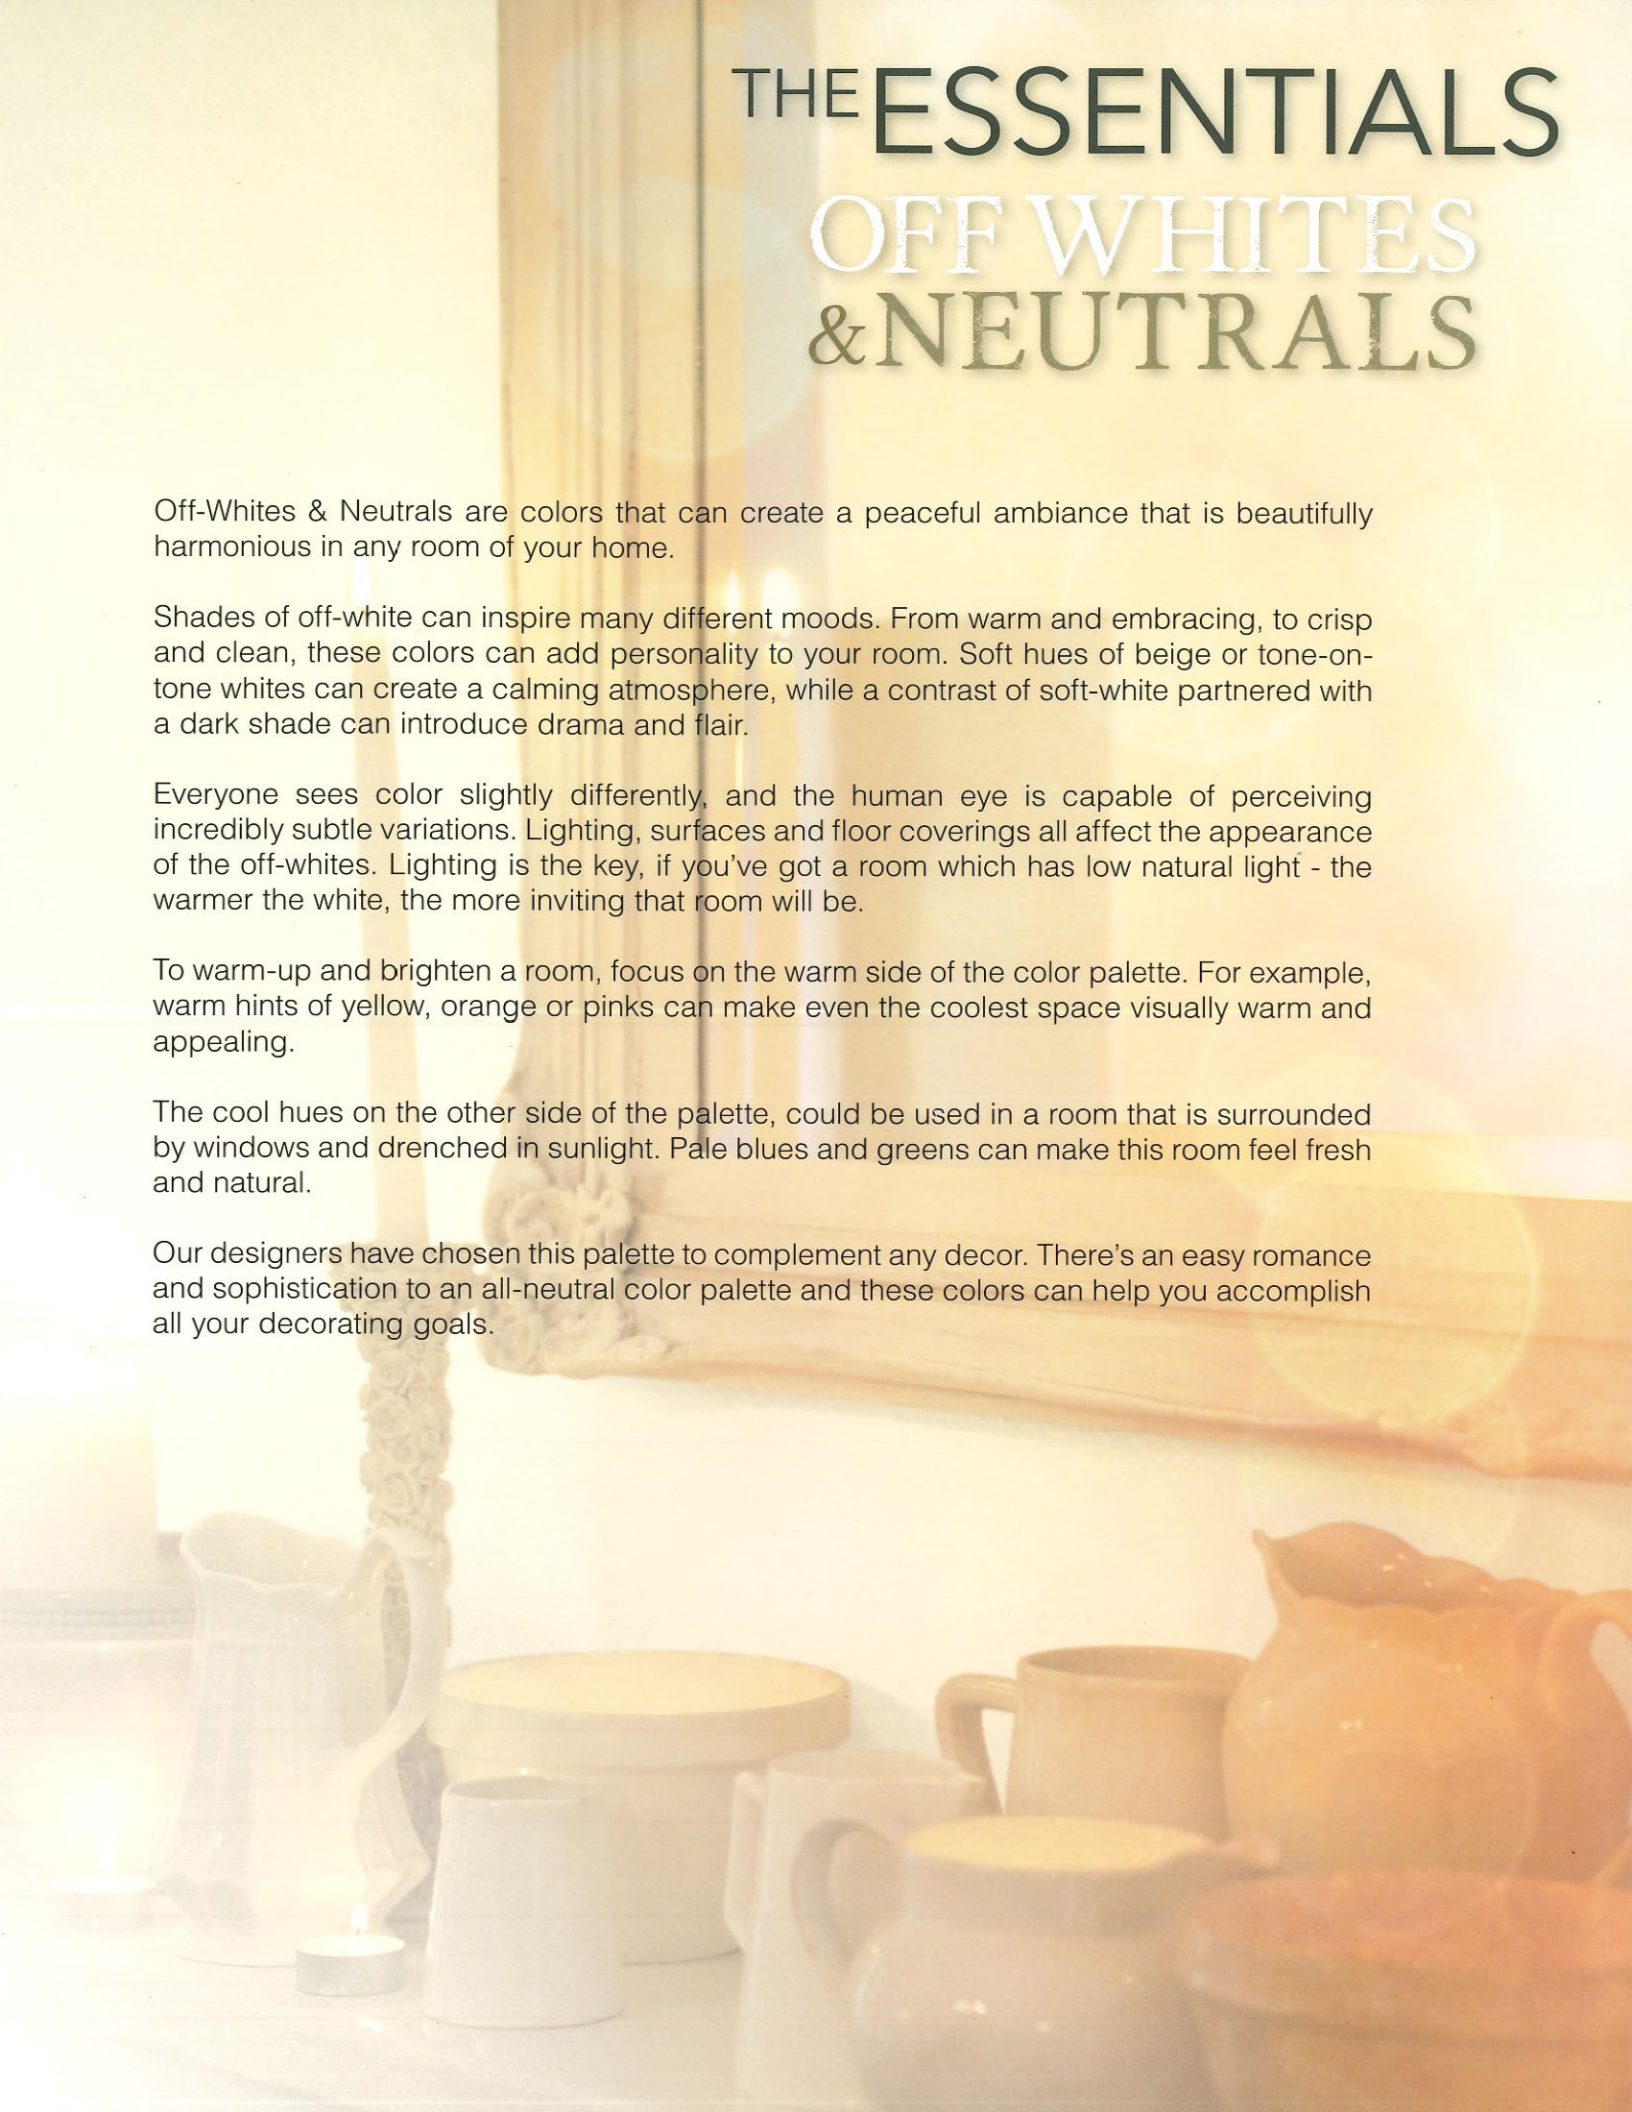

Shades of off-white can inspire many different moods. From warm and embracing, to crisp and clean, these colors can add personality to your room. Soft hues of beige or tone-on-tone whites can create a calming atmosphere, while a contrast of soft-white partnered with a dark shade can introduce drama and flair.

Everyone sees color slightly differently, and the human eye is capable of perceiving incredibly subtle variations. Lighting, surfaces and floor coverings all affect the appearance of the off-whites. Lighting is the key, if you've got a room which has low natural light - the warmer the white, the more inviting that room will be.

To warm-up and brighten a room, focus on the warm side of the color palette. For example, warm hints of yellow, orange or pinks can make even the coolest space visually warm and appealing.

The cool hues on the other side of the palette, could be used in a room that is surrounded by windows and drenched in sunlight. Pale blues and greens can make this room feel fresh and natural.

Our designers have chosen this palette to complement any decor. There's an easy romance and sophistication to an all-neutral color palette and these colors can help you accomplish all your decorating goals.

THE ESSENTIALS OFF WHITES & NEUTRALS

Soothe your senses while refreshing the look of your space with an offering of colors from the **Color Guild - Whites and Neutrals Color Collection**. Naturally calming, the colors of this palette work together to add a warm, welcoming feeling to every room. The result is a beautiful home that evokes a feeling of comfort and style.
