

3220 Series

EnduraTread®

2K WATERBORNE ACRYLIC URETHANE

PROTECT the Finish. PRESERVE the Look. Floor-grade durability and lasting clear protection.

A great-looking floor deserves a finish built to protect it. **3220 EnduraTread® 2K Waterborne Acrylic Urethane Clear** provides a tough, durable wear layer over decorative flake, epoxy, and other resinous flooring systems, helping protect the finished surface from abrasion, scratches, stains, and everyday wear.

Available in **Clear Satin and Clear Gloss**, EnduraTread 3220 delivers excellent UV stability and non-yellowing performance to help preserve the color and character of the floor beneath it. Excellent chemical and stain resistance

provide added protection in demanding residential, commercial, and light industrial environments where lasting appearance matters as much as durability.

Its advanced waterborne acrylic urethane technology delivers the performance characteristics of traditional solvent-based urethanes with **very low VOC, low odor, and easy water cleanup**. Beyond its role as a protective topcoat, EnduraTread 3220 can also be used as a durable clear sealer over properly prepared bare and decorative concrete surfaces.

- **Protects Decorative Floors** — A durable wear layer for flake, epoxy, and resinous flooring systems
- **Resists Abrasion & Scratching** — Helps finished floors stand up to traffic and everyday wear
- **UV Stable & Non-Yellowing** — Helps preserve color and appearance
- **Chemical & Stain Resistant** — Added protection against common spills and exposures
- **Waterborne Technology** — High-performance protection with low odor, very low VOC, and water clean-up.
- **Added Sealing Versatility** — Also protects properly prepared bare and decorative concrete

Available in
3220.100 CLEAR GLOSS
3220.035 CLEAR SATIN
